

Aftermarket

It's time to upgrade your sand filter's airlift!

New high-density polyethylene (HDPE) airlift and new segmented design!

We're so confident of the design, we're including a 24-month warranty on all new HDPE units, effective after shipment.

Material Upgrade - HDPE

- Greater wear resistance than PVC
- More robust option than PVC
- Similar longevity to stainless steel, but less expensive

Design Upgrade - Segmented

- Opportunity to replace future segments vs. complete unit replacement
- Fit in smaller, less expensive packaging
- Lower freight costs with more sustainable packaging in standard box trucks
- Eliminate potential bending and warping in storage
- Smaller space needed for shelving spares
